PROFESSIONAL SUMMARY:

Full Stack Developer with **2.11 years of experience** in developing web-based applications using **Angular, TypeScript, .NET Core and SQL Server**. Skilled in building **scalable enterprise applications, RESTful APIs and responsive user interfaces**. Experienced in **database design, API integration, debugging, performance optimization and IIS deployment on Windows Server environments**. Proficient in **API documentation using Swagger, structured logging using Serilog and secure authentication using JWT tokens**. Strong background in writing **BRD and FRD**, collaborating with cross-functional teams and delivering reliable software solutions using tools like **Git, Visual Studio, VS Code, SSMS and JIRA**.

TECHNICAL EXPERTISE:

• **Frontend Development:** Expertise in **Angular, TypeScript, HTML5, CSS3 and Bootstrap** for building dynamic and responsive web applications. Skilled in **lazy loading modules, Angular lifecycle hooks, reusable components and global CSS architecture** to improve performance and maintainability.

• **Backend Development:** Proficient in **.NET Core and ASP.NET Web API** for designing and implementing **RESTful APIs**. Experienced in implementing **Controller–Service–Repository architecture, Dependency Injection and Data Transfer Objects (DTOs)** for scalable backend development.

• **Database Management:** Strong proficiency in **SQL Server**, including **stored procedures, views, indexing strategies and query optimization** to ensure efficient data retrieval and improved application performance.

• **UI/UX Design:** Developed **mock UI designs using HTML, CSS and Bootstrap**, ensuring seamless frontend-backend integration and intuitive user experience.

• **Testing & Debugging:** Experienced in **unit testing using xUnit/NUnit**, debugging backend APIs and resolving production issues to improve application reliability.

• **API Documentation & Monitoring:** Implemented **Swagger (OpenAPI)** for API documentation and testing. Utilized **Serilog structured logging** for application monitoring and debugging.

• **Deployment & Performance Optimization:** Experience in **deploying .NET applications on IIS hosted on Windows Server**, optimizing application performance using **lazy loading, pagination, SQL query tuning and indexing strategies**.

PROJECT HIGHLIGHTS:

• Contributed to **frontend and backend development for ERP enterprise systems** at CORtracker360.

• Designed and implemented **RESTful APIs using .NET Core Web API**, enabling seamless communication between frontend and backend systems.

• Improved application performance by implementing **SQL query optimization, indexing strategies, pagination and Angular lazy loading modules**.

• Implemented **Swagger API documentation** for easier API testing and developer collaboration.

• Deployed applications using **IIS on Windows Server environments**, ensuring stable production deployments.

• Enhanced application reliability by implementing new features, resolving critical bugs and addressing client requirements.

TECHNICAL SKILLSET:

- **Programming Languages:** C#, TypeScript
- **Frontend Technologies:** Angular, HTML5, CSS3, Bootstrap, SCSS
- **Backend Technologies:** .NET Core, ASP.NET Web API, Entity Framework
- **Database Management:** Microsoft SQL Server (**Stored Procedures, Views, Indexing, Query Optimization**)
- **Testing & Debugging:** Unit Testing **(xUnit/NUnit)**, Debugging
- **Security & Services:** JWT Token Authentication, SMTP Email Services (OTP & Notifications)
- **Logging & Monitoring:** Serilog for structured logging
- **Documentation:** Writing Business Requirement Documents (BRD) and Functional Requirement Documents (FRD)
- **Version Control:** Git, GitHub
- **Tools & Platforms:** Visual Studio, VS Code, SSMS, Git, GitHub, JIRA, Coda

PROJECTS:

Enterprise Resource Planning (ERP) – CORtracker360

Role: Full Stack Developer

Responsibilities & Contributions:

- Developed and maintained frontend features using **Angular**, **Typescript** and **Bootstrap**, ensuring a responsive and dynamic user experience.
- **Designed and implemented** global CSS styles using **Bootstrap and CSS**, ensuring UI consistency and scalability.
- **Developed mock UI designs** using **HTML, CSS and Bootstrap**, translating business requirements into interactive layouts.
- **Built and integrated REST APIs** using **.NET Core and ASP.NET Web API**, enabling smooth communication between the frontend and backend.
- **Developed and optimized SQL Server stored procedures, views and queries** to improve database performance and ensure efficient data retrieval.
- **Designed and maintained** database schemas, ensuring proper data structuring and flow between application layers.
- **Implemented Data Transfer Objects (DTOs)** to manage complex data transformations between the frontend and backend.

- **Worked on new enhancements and client requirements**, including **building dynamic web forms and developing REST APIs** to support additional functionalities.
- **Fixed critical bugs and resolved production issues**, including **source stoppers and performance bottlenecks**, ensuring seamless application functionality.

Technologies: Angular, Typescript, HTML, CSS, Bootstrap, .NET Core, ASP.NET Web API, SQL Server

WORK EXPERIENCE

Software Developer – CORtracker360, Hyderabad

Sep 2023 – Present

Angular Frontend Development:

- Developed and maintained **responsive and dynamic UIs** using **Angular, Typescript and Bootstrap**.
- **Integrated REST APIs with Angular frontend, ensuring seamless communication with backend services**.
- Built modular and reusable **Angular Components**, **pipes and lifecycle hooks** for **optimized performance**.
- Implemented **lazy loading** and optimized **state management** to enhance **application performance and scalability**.
- Developed **UI mock-ups using HTML, CSS and Bootstrap**, ensuring a **consistent and user-friendly design**.

.NET Core Backend Development:

- Developed and maintained **REST APIs** using **.NET Core** and **ASP.NET Web API**, ensuring efficient communication between frontend and backend systems.
- Designed and optimized **SQL Server databases**, including tables, views and indexing strategies, to enhance data management and performance.
- Wrote optimized **SQL queries, stored procedures** and functions for efficient data retrieval and processing.
- Implemented **Data Transfer Objects (DTOs)** to ensure structured data handling between frontend and backend, improving type safety and reducing redundant data transmission.
- Integrated **REST APIs** with Angular frontend, ensuring seamless data flow between application layers.
- Utilized **Entity Framework** for database management and data access, simplifying data operations and improving maintainability.

IBEE Software Solutions – Remote

Software Developer | Jun 2023 – Aug 2023

Project: Adhaan News – Short-form News Delivery App

- Developed and optimized **RESTful APIs** for delivering real-time, personalized news feeds.
- Collaborated with frontend developers to ensure responsive and **dynamic UI design**.

- Improved query efficiency and performance by implementing optimized **SQL procedures.**

Technologies: .NET Core, Web API, C#, SQL Server, jQuery, Bootstrap

EDUCATION:

- **Bachelor of Technology (B.Tech)**, Electronics & Communication Engineering, JNTUK – **2021**
